Dist. Bagalkot (Karnataka) India

No. JKCW / ENV. /E.C. / (PLANT)/89/11
Date-18-05-2021

To
The Scientist-F
Ministry of Environment \& Forest
Govt. of India, Indira Paryavaran Bhavan
Aliganj, New Delhi- 110003
Sub: Half Yearly Environmental Clearance Compliance report for the period from October-2020 to March-2021 for JK Cement Works, Village- Muddapur, Taluka- Mudhol, District- Bagalkot (Karnataka)

Ref: MoEF Letter F. No. J-11011 / 489 / 2006-1A.II (I) / dtd. 14-09-2007

Dear Sir,

With reference to your above cited environmental clearance letter of our Cement Plant, we are sending here with enclosed point wise environmental clearance compliance report for the period from October2020 to March-2021 for our JK Cement Works (Cement Plant -2.20 MTPA Clinker \& 2.50 MTPA OPC and Captive Power Plant $2 \times 25$ MW, for JK Cement Works, Village Muddapur, Taluka Mudhol, District Bagalkot, Karnataka for your kind information and record please.

Thanking you

Encl. - EC Compliance report, Socio-economic development report \& six monthly manual AAQ monitoring, stack, fugitive emission, treated effluent monitoring, noise monitoring, continuous emission monitoring and CAAQM report
CC:
1- The Addl. Principal Chief Conservator of Forest (C), Ministry of Environment \& Forest, Regional Office (South Zone), Koramangala, Bangalore
2- Chairman, Central Pollution Control Board, Parivesh Bhavan, East Arjun Nagar, New Delhi
3- Scientist 'D' \& Incharge, Central Pollution Control Board, 1st \& 2nd Floors, Nisarga Bhavan, ABlock, Thimmaiah, Main Road, 7th D Cross, Shivanagar, Opp. Pushpanjali Theatre, Bengaluru

J.K. Cement Works, Village- Lokapur, Taluka-Mudhol, District- Bagalkot, Karnataka

Ref: - MoEF Letter F. No. J-11011 / 489 / 2006-1A.II (I) / dtd. 14th September 2007
Environmental Clearance Compliance Report for the period from October, 2020 to March, 2021

## Name of Project: M/s J.K. Cement Works, Muddapur (Karnataka)

EC to Cement Plant (2.20 MTPA) Clinker \& 2.50 MTPA OPC and Captive Power Plant ( $2 \times 25$ MW) at Village- Lokapur, Mudhol, District Bagalkot, Karnataka

| i. | Electrostatic precipitator (ESP) to cooler, Bag House to Raw mill, Bag filter to coal kiln burner and pre calciner shall be provided. On line gas analyzer for $\mathrm{O}_{2}, \mathrm{CO}$, emission at kiln inlet and power House out let and on line dust monitor to kiln and cooler shall be provided. A closed clinker system shall be adopted to control fugitive emission. Water sprinkler shall be done in raw material stock yard and cement bag loading areas. | Complied. Electrostatic precipitator (ESP) to cooler, Bag House to Raw mill, Bag filter to coal kiln burner and pre calciner have been provided. On line gas analyzer for $\mathrm{O}_{2}, \mathrm{CO}$, emission at kiln inlet and on line dust monitor to kiln and cooler have been provided. A closed clinker system has been adopted to control fugitive emission. Water sprinkler is done in raw material stock yard and cement bag loading areas. |
| :---: | :---: | :---: |
| ii. | The total water requirement from Ghatprabha River source shall not exceed $1046.4 \mathrm{~m}^{3} /$ day. The treated waste water shall be recycled and reused in the process and or for dust suppression, green belt development and other plant related activities etc. The Effluent generated by CPP will also be used in the cement manufacturing process. No process waste water shall be discharged outside the factory premises and zero discharge shall be adopted. Domestic effluent treated in sewage treatment plant (STP) shall be used for green belt development within the plant and colony areas. | Complied. We are not abstracting water more than $1046.4 \mathrm{~m}^{3} /$ day from Ghatprabha River. Dry manufacturing process has been adopted for cement manufacturing so no waste water is generated in cement plant. The treated waste water, generated in CPP, is being used for dust suppression, green belt development, other plant related activities /process. So, no process waste water is being discharged outside the factory premises and zero discharge is being adopted. Domestic effluent treated in sewage treatment plant (STP) is used for green belt development within the plant and colony areas. |
| iii. | The fly ash and bottom ash generated from the power plant shall be used in the process itself for manufacturing PPC. All the cement dust collected from the pollution control devices shall be recycled and reuse in the process and used for cement manufacturing. The fly ash utilization shall be as per the provision stipulated in the fly | Complied, The fly ash and bottom ash generated from the power plant are being used in the process itself for manufacturing PPC. All the cement dust collected from the pollution control devices is recycled and reused in the process and used for cement manufacturing. The fly ash utilization is as |

Environmental Clearance Compliance Report for the period from October, 2020 to March, 2021

|  | ash notification of September, 1999 and amended in august, 2003. STP sludge shall be used as manure for green belt development. Used oil shall be sold to authorized recycler / re processor only. | per the provision stipulated in the fly ash notification of September, 1999 and amended in august, 2003. Quarterly report on fly ash utilization is being submitted to PCB. STP sludge after generation to be utilized as manure for green belt development. We have obtained permission to dispose in-house generated used oil/waste oil in our kiln. |
| :---: | :---: | :---: |
| iv. | High calorific hazardous waste shall be utilized in the cement plant. | Complying. We have obtained the permission from KSPCB for co-processing various hazardous wastes and NonHazardous wastes vide KSPCB authorization letter no. PCB/WMC/293/HWM /2016 / 2883 dated 31 August 2018. We are co-processing various hazardous and Non- Hazardous wastes in our kiln after getting approval from KSPCB. |
| v. | As proposed in EIA / EMP, green belt shall be developed in 80 ha. ( $66 \%$ ) out of total 120 ha. As per the CPCB Guidelines to mitigate the effect of air emission in consultation with local DFO. | As a part of green belt development, We have received a certificate from forest department via. Letter no. B2.GFL/Mines/2007-08/597 dated 30-082007 regarding availability of local Flora and Fauna in Mudhol Taluka. We have planted a number of plants in and around cement plant and colony. We have covered more than $33 \%$ area of total land area from plantation. |
| General Condition : |  |  |
| i. | The project authorities shall adhere to the stipulation made by Karnataka State Pollution Control Board and State Government. | Agreed |
| ii. | No further Expansion or modification of the plant shall be carried out without prior approval of Ministry or rules made there under. | Agreed. We have obtained environmental clearance for expansion of Cement Grinding Unit (2.50 MTPA to 3.5 MTPA) via. MoEF Letter No FNo J |

## J.K. Cement Works, Village- Lokapur, Taluka-Mudhol, District- Bagalkot, Karnataka

Ref: - MoEF Letter F. No. J-11011 / 489 / 2006-1A.II (I) / dtd. 14th September 2007
Environmental Clearance Compliance Report for the period from October, 2020 to March, 2021

|  |  | 11011/263/2009-IA II (I) dated 21-06-2010 and also obtained permission for manufacturing the cement based adhesive without increasing the production capacity from MoEF via F. No J 11011/263/2009- IA II (I) dated 26 September 2012. |
| :---: | :---: | :---: |
| iii. | The gaseous and particulate matter emission from various units shall confirm to the standards prescribed by the KSPCB. Interlocking facilities shall be provided in the pollution control so that in the event of the pollution control equipment not working, the respective unit(s) is shutdown automatically. | Complying, we have provided online monitoring instruments at major stacks and the gaseous and particulate matter emissions from various units are within the standard prescribed by the KSPCB/CPCB/MoEF. Interlocking facilities have been provided in pollution control equipment. |
| iv. | One Ambient Air Quality Monitoring station shall be installed in down wind direction. Ambient air quality including Ambient Noise Level shall not exceed the standard stipulated under EPA or by the state authorities. Monitoring of Ambient air quality and stack emission shall be carried out regularly in consultation with KSPCB and report submitted to the KSPCB quarterly and to the Ministry Regional Office at Bangalore Half Yearly. | Complied, we have installed total 4 Nos. of monitoring station in cement plant Ambient air quality including ambient Noise level is not exceeding the standard stipulated under EPA or by the state authorities. Monitoring of Ambient air quality and stack emission are being carried out regularly in consultation with KSPCB and reports are being submitted to the KSPCB monthly/quarterly and to the Ministry Regional Office at Bangalore Half Yearly. |
| v. | The Company shall install adequate dust collection and extraction system to control fugitive dust handling (Unloading, conveying, transporting, and stacking) vehicular movement, bagging and packing areas etc. Asphalting / concreting of roads and water spray all around the stock yard and loading / unloading areas shall be carried out to control fugitive emission. Covered sheds for storage of raw materials and fully covered conveyors for transportation of materials shall be | Complied, we have installed adequate dust collection and extraction system to control fugitive dust handling. Asphalting / concreting of roads and water spray all around the stock yard and loading / unloading areas are being carried out to control fugitive emission. Covered sheds for storage of raw materials and fully covered conveyors for transportation of materials have been provided besides coal. Cement, fly ash and clinker are stored in silos. |

J.K. Cement Works, Village- Lokapur, Taluka-Mudhol, District- Bagalkot, Karnataka

|  | provided besides coal, cement, fly ash and clinker shall be stored in silos. |  |
| :---: | :---: | :---: |
| vi. | Prior permission from the State Ground water Board, Central Ground Water Authority (SGWB / CGWA) regarding drawl of ground water shall be obtained. | Ground water abstract permission have been obtained from Karnataka Ground Water Authority, Bangalore via. Letter no. KGWA/GW/NOC/32/2020-21/4323 dated 30.03.2021. |
| vii. | The company must harvest the rain water from the roof tops and storm water drains recharge the ground water and use the same water for the various activities of the project to conserve fresh water. | Complying, we are harvesting the rain water from roof tops. Storm water drains are recharging the ground water in colony and cement plant. |
| viii. | The company shall undertake ecodevelopment measures including community welfare measures in the project areas. | Complying, we are undertaking ecodevelopment measures like energy saving, hazardous wastes, Manufacturing of PPC/Slag cement and other wastes disposing etc. including community welfare measures. |
| ix. | The overall noise levels in and around the plant area shall be kept well within the standards ( 85 dBA ) by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall confirm to the standards prescribed under Environments (Protection) Act, 1986 Rules 1989 viz 75 dBA (Day Time) and 70 dBA at (Night Time). | Complying, the overall noise levels in and around the plant area is well within the standards ( 85 dBA ) by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels are well within the standard prescribed under Environments (Protection) Act, 1986 Rules 1989 viz 75 dBA (Day Time) and 70 dBA (Night Time). |
| x. | All recommendations made in the Corporate Responsibilities for Protection (CREP) for cement plants shall be implemented. | Complying, Recommendations made in the charter on Corporate Responsibility for Environment Protection (CREP) for the cement plants are being implemented. |
| xi. | Proper housekeeping and adequate occupational health program shall be taken up. | Complying, Proper housekeeping and adequate occupational health programmes are being taken up. |
| xii. | A separate Environmental Management cell to carry out various management and | Complied, A separate Environmental Management cell to carry out various |

| DESCRIPTION | Expenditure (in Lakh) |
| :--- | :---: |
| Air Pollution Control in Kiln, Cooler, cement mill, coal mill, and <br> LS crusher (main equipment) including stacks, Bag filters along <br> with ventilation system for the control of fugitive dust emissions <br> from the plant including stacks/ Cost of equipment for controlling <br> emission like bag house, ESP, Bag filter etc., Operational <br> cost/electricity cost, Operation \& Maintenance cost | 756.512 |
| Fly ash Silo's and ash handling systems |  |
| Emission Monitoring equipment (including online emission <br> monitoring equipment (CEMS) at sources and ambient air quality <br> in the vicinity) and laboratory | 112.54 |
| Green Belt Development, Sewage Treatment plant and Water <br> Harvesting Schemes <br> for plant | 2.04 |
| Extra expenditure on green purchase (Purchase of green fuel, <br> recycled materials or any other such purchase (AFR purchase, Fly <br> ash and Slag purchase) to reduce environmental footprint | 2369.44 |
| Other environmental management costs (AFR system operation, <br> odour control, environmental training/Award, SNCR system CPP, <br> Environmental License Fees) | 307.09 |
| TOTAL (Rs in Lakhs) | $\mathbf{3 5 7 8 . 7 7}$ |
