Subject- **Environmental Statement Report of Halki Limestone Mine, Village- Halki, Dist. - Bagalkot (Karnataka) for the financial year April-2016 to March-2017**

Dear Sir

As per 14 of Environment (Protection) Rule 1986, please find herewith enclosed Environmental Statement Report for Halki Limestone Mine, Village- Halki, Dist.- Bagalkot (Karnataka) in **Form V** for the financial year **2016-2017** for your kind information and record, please.

Thanking you,

Yours faithfully,
Halki Limestone Mine

PART - F

PLEASE SPECIFY THE CHARACTERISATIONS (IN TERMS OF COMPOSITION AND QUANTUM) OF HAZARDOUS AS WELL AS SOLID WASTES AND INDICATE DISPOSAL PRACTICE ADOPTED FOR BOTH THE CATEGORIES OF WASTES.

Hazardous waste: No hazardous waste is generated in mines.

Solid waste: Solid waste from the mine is overburden and maximum qty. of it is dumped in predetermined dumping area and a little bit qty. is used for maintenance of haulage road, gardening etc. The total overburden generated from the April-2016 to March-2017 was 244354.85 MT.

PART – G

IMPACT OF THE POLLUTION ABATEMENT MEASURES TAKEN ON CONSERVATION OF NATURAL RESOURCES AND ON THE COST OF PRODUCTION.

AIR

There is no harmful impact observed on vegetation & water bodies in the surrounding areas due to mining activities because dust is suppressed at its generating sources.

The following measures are taken to suppress the dust at the source as well as to prevent the same, spreading in the atmosphere:

- Wet drilling system is provided on all drill machines.
- Regular water sprinkling on haul road during operation.
- Optimize blasting parameters for proper fragmentation to reduce dust generation.
- Plantation and development of Green Belt along the Haul Roads and Working Pits.

WATER

Being Mechanized Limestone mine, it requires water mainly for Wet Drilling and Road Spraying, Green Belt Development. The source of water is the accumulated rainwater in the lower most benches. At Halki Mine there is no discharged of liquid effluent / waste water from the Mine.

No discharge of rain water or waste water from the mine to outside lease area. Rain water in the catchment area of mine lease is diverted through drainage in to lower level area of mine and that water is used for dust suppression and plantation purpose.

NOISE

Noise is generated in the mine due to following mining activities:

- Excavation, drilling, blasting and operations of HEMM.
- Transportation and handling of material.

The results of base line noise level survey are well below the permissible limit except near machinery while operating. The noise generating sources are scattered within the whole mining area. All the sources will not generate the noise simultaneously hence; the noise level would not alter the noise environment significantly. The noise level reduces with increase in distance from the source.

The following measures are taken to reduce the noise level at the source as well as to prevent the same, spreading in the atmosphere:

- Providing enclosures for noise sources to reduce dispersion of noise like cabin in HEMM.
- Proper maintenance and lubrication of machinery rotating parts.
- Use electric delay detonator on surface in place of detonating fuse.
- By covering the detonating fuse as well as detonators under drill cutting or the fine material.
- By providing earmuffs and earplugs to eligible miners.
- Use of Air Decking & sufficient column stemming in the blast holes.

PART – H

ADDITIONAL MEASURES / INVESTMENT PROPOSALS FOR ENVIRONMENTAL PROTECTION INCLUDING ABATEMENT POLLUTION, PREVENTION OF POLLUTION.

Green belt development and tree plantation is our ongoing process. Plantation has been done on OB sites, road sides and on other parts of non mineralized ML area. The top layer of the dump material and slopes is covered with top soil which is excellent property of water retention that supports good tree growth. Plantation details are following.

Year	No. of trees planted
Upto March, 2010	9350
2010-2011	6435
2011-2012	5854
2012-2013	Within lease- 10750
2013-2014	Within lease- 4630
2014-2015	Within lease- 1270
2015-2016	Within lease- 2400
2016-2017	Within lease area- 750 Outside lease area- 80

PART – I

ANY OTHER PARTICULARS FOR IMPROVING THE QUALITY OF ENVIRONMENT.

- Regular water spraying is being done on haulage road and near loading places for effective dust suppression.
- Thick plantation in and around the mine is being done.
- Regular and proper maintenance of noise generating machinery including the transport vehicles is being done to maintain noise levels.
- Air quality is being regularly monitored.
- Delay detonators and shock tube initiation system is being used for blasting so as to reduce vibration and dust.
- Sharp drill holes and drills with water flushing systems are being used to reduce dust generation.
- We are providing all personal protective equipment (PPEs) to all mine employees i.e. dust mask (respirator), ear plug & ear muff, eye goggle etc. Concern to them as additional measures of Air & Noise Pollution Control.
- We are having full flash environmental laboratory for the monitoring of ambient air quality, water testing, noise monitoring etc.
- Industry has been certified for standards ISO 9001: 2008, ISO 14001: 2004 and OHSAS 18001.
- Company publishes its magazine i.e. JK Spotlight. Environmental messages also printed in it.
