WATER MANAGEMENT POLICY

JK Cement committed towards water management and conservation that water is a key source for continuing its business operations and the value attached to it for its stakeholders as an integral part of business philosophy. We recognize that good quality water has strong sustainability and ecosystem service values. Protecting and conserving water resources through excellent water management practices and governance systems. Water management is not only a business imperative but also provide it with a competitive advantage in the long run.

We shall endeavor to:

- Complying with all legal and applicable rule, law, regulation and other requirement to water related.
- Minimize our impact on water resources from operations by measuring and understanding water use, management and wastewater generation
- Reduce water consumption (freshwater, groundwater) by re-use, recycling water and implementing more sustainable use of water sources.
- Implementation of rain water harvesting measures to increase water table.
- Implement a water monitoring system for water usage and consumption.
- Implementation of latest technology to reduce water consumption and ensure zero water leakages.
- Involve employees and contract workers and water conservation initiatives.
- Engage with other stakeholders and communities to increase their awareness on the responsible use of water and involve them in protection of water resources
- Communicate on the progress and performance of water conservation and water management efforts to stakeholders.

Rajnish Kapur
